Login data

<input checked="" type="checkbox"/>	QS-ID	Name	Email	Status Login	Password validity
<input checked="" type="checkbox"/>	4048473657143	Schweinestandort		password generated	25.12.2019
<input checked="" type="checkbox"/>	4048473732987	Gartenbautechnik		password generated	25.12.2019

- There are two possibilities to send the login data:
  - As e-mail (Button: dispatch by email)  
The e-mail will be sent in the language chosen by the company manager
  - As letter (Button: PDF)  
The PDFs can be selected in two languages (German/English)
- The farmer/producer receives the login data via e-mail or letter

### Access to your stored data in the QS scheme

Dear Mr. nsjk,

In order for you to be able to view and check your own data in the future, we have created the possibility for you to view your data..

Via the internet address <https://www.q-s.de/softwareplattform> you can dial into the software platform with the help of your username and password.

Please note the upper and lower case of the password !

User-ID: 4048473178471  
Password: KQRW6s3W=qOwtk5l

Note:

When logging in for the first time, you will be prompted to re-assign a password yourself.

Yours sincerely,

Pau Hippo

- New access data must be sent if the farmer/producer changes the coordinator and if the producer is de-registered and then registered again by the same coordinator. In these cases, the previous data will not be valid anymore.

**Instruction:**  
**Send login data to coordinated**  
**livestock owners/producers**

Version: 15.07.2019  
Status: ● Release  
Page 2 of 3

Qualitätssicherung. Vom Landwirt bis zur Ladentheke.

- The farmer/producer can access the database with his login data
  - When the first log-in takes place, the farmer/producer must define an own password

#### Change password

User-ID	4048473178471	OK
Old password	*****	
New password	*****	Cancel
Retype password	*****	
Retry	0	

- Afterwards the farmer/producer has access to his/her data.

Password was changed

**Please find information on the login status under the menu item „Login data“ after removing the tick at „no access data“:**

- Status Login
  - Password generated: The coordinator has generated login data (pdf or email).
  - Own password generated: The farmer has used his log in data to log in to the data base and has generated his own password.
- Password validity
  - Date: The log in generated by the coordinator is valid for 6 months.
  - Unlimited: The farmer has logged in and has generated his own password.
  - Login blocked: As a coordinator, you can send a new password or the farmer can request a new password by clicking on „Forgot password?“ if you have entered an email address for the farmer
